

# School Safety Audits without the drudgery using ANT AUDITOR

Advanced New Technology has been working closely with Barnsley Council implementing their ANT AUDITOR system. Doug Cartwright, H&S Manager, is responsible for undertaking more than 100 audits at 120 schools. Although this is a major task it is also essential that standards be audited to ensure they are being maintained effectively. This enables schools to be pro active in their accident management strategy, especially in high-risk environments.

Barnsley Metropolitan Borough Council adopted ANT AUDITOR for many reasons. Using PDAs (Pocket PC computers) has allowed them to eliminate unnecessary paperwork and has generated time savings in the audit process of 40%.

ANT AUDITOR's flexibility enables Barnsley to create their own specific audit questionnaires, answer types, scores and guidance notes. Using the standard action facility their auditors can simply select the required action during the audit, eliminating the need for action plans to be generated after the event as an additional task. Comprehensive audit reports can be produced within minutes of the audit results being transferred from the PDA. These reports can include summary and full detail of conforming and non conforming events, pictures, graphs and policy statements.

Another key benefit is ANT AUDITOR's powerful analysis features. Audits can be analysed down to question level and failures and non-conformances can be monitored over time so that trends and possible problem areas can be pro-actively managed.

## Other Councils Using ANT AUDITOR:

Devon, Hillingdon, Torbay, Exeter, Buckinghamshire, Havering, Scarborough, Sandwell

### Council Safety

- School Audits
- Departmental H&S Audits
- Catering Audits
- Building Condition Surveys
- Contractor Audits
