

ANT Auditor for Award Winning Norfolk County Services

ANT Auditor user Norfolk County Services has just collected a national Business in the Community award from the Department of Trade and Industry. The award was presented by Prince Charles and environmental campaigner and former US Vice President Al Gore at a ceremony at the Royal Albert Hall in London.

Norfolk County Services employs 4,400 catering, cleaning, grounds and building maintenance staff across Norfolk, Suffolk and Cambridgeshire at 1,100 sites, many in remote rural areas.

When NCS Health & Safety Manager Graham Findlay was about to embark on a new round of comprehensive health and safety audits in the autumn of 2006, he realised that he would need some pretty powerful help to get the job finished on time.

Ravensfield Ltd were asked to come in and demonstrate ANT Auditor and were quickly able to convince NCS that this was the way forward for them. Following the presentation, ANT Auditor was ordered, delivered, installed, configured and initial training completed within three weeks.

Because of the wide range of activities carried out by NCS, their Health & Safety Audit has to cover a multitude of work areas, including construction, transport catering, care services, grounds maintenance, and many others, and Ravensfield and NCS were able to set up the audit on ANT Auditor in around three hours.

Graham is now well on his way with the audit program and is already looking at other areas where he can see measurable benefit using ANT Auditor within Norfolk County Services.

And because of Ravensfield's commitment to work with and support their customers, Graham is confident that he can get the support he needs when he needs it.
